

PROFESSIONAL SUMMARY

Dynamic software programmer with a strong foundation in coding across diverse platforms, adept at debugging and optimizing performance to deliver high-quality solutions. Passionate about collaborating with innovative teams to design and implement robust system architectures. Committed to continuous learning and professional growth within the software development field, leveraging technical expertise to drive impactful projects. Eager to contribute fresh ideas and a collaborative spirit to a forward-thinking organization.

SKILLS

- Languages: C#, C++, Python, Java, JavaScript, HTML, CSS
- Tools: VS Code, Visual Studio, Xcode, SQL, Git, Unity, Flask
- Concepts: Object-Oriented Programming, Cross-Platform Development, and Debugging, Agile
- Time management
- Team collaboration
- Decision-making

EXPERIENCE

- Fulfillment Expert** • *Target*
Munster, IN • October 2024 to Current
- Collaborated with team members to meet daily targets, contributing to overall company success and growth.
 - Enhanced customer satisfaction with timely processing and shipping of orders, ensuring prompt delivery to customers for pickup in 2 hours or less.
- Web Developer** • *Office of Diversity & Inclusion*
Marquette, MI • December 2024 to May 2025
- Used the Drupal framework and limited HTML.
 - Enhanced user experience by implementing responsive web design and optimizing website performance.
- Shift Leader** • *Northern Lights Dining*
Marquette, MI • August 2021 to October 2024
- Promoted from general team member, to zone lead, to shift lead.
 - Provided training for new hires on service procedures, fostering a knowledgeable workforce committed to delivering quality results to over 5,000 students.

EDUCATION

- Bachelor of Science** - Computer Science – Mathematics Minor • *Northern Michigan University*
Marquette, MI • May 2025
GPA: 3.50 (Cum Laude)

PROJECTS

- Custom Shell (C++): Engineered a fully functional custom shell featuring command parsing, process control, and I/O redirection, leveraging low-level system calls and file descriptor redirection to implement a robust execution pipeline.
- 2D Mobile Game Development (Unity, C#) – Senior Project in Computer Science: Developed a fully playable 2D mobile game in Unity (C#), building interactive UI, integrating a custom shader via Shader Graph, and applying polymorphism while optimizing for mobile input and platform performance.
- Technical Coursework: Object-Oriented Programming, Data Structures, Algorithms Design & Analysis, Operating Systems, Server-Side Programming
- Math & Theory: Calculus 1, 2 & 3, Linear Algebra, Discrete Mathematics
- Systems & Tools: Operating Systems, Microarchitecture, Programming in C++, Network Programming

COMPLETED COURSES
